

SCI Engineered Materials

Industry Leading Bonding Technology

SCI Engineered Materials has provided planar Indium bonding services for over 20 years. We have expanded our bonding capabilities to include planar & elastomer bonding, as well as Indium bonding of Rotatable Target assemblies.

SCI provides precision machining of backing plates and tubes to customer, or OEM specifications. Backing plates and tubes are available in various materials to minimize thermal mismatch with target materials.

Ultrasonic C-Scan Technology used to verify bond integrity on planar and rotatable bonds
