The Science of Engineered Materials™

SCI Engineered Materials, Inc. Announces \$2 Million Order for Thin Film Solar Products

COLUMBUS, Ohio (June 27, 2018) SCI Engineered Materials, Inc. ("SCI") (SCIA: OTCQB), a global supplier and manufacturer of advanced materials for physical vapor deposition thin film applications who works closely with end users and OEMs to develop innovative, customized solutions, today announced it has received a \$2 million order for transparent conductive oxide products from a Cadmium Indium Gallium Selenide (CIGS) thin film solar cell manufacturer. Initial shipments are expected to begin later this year and completed during 2019.

Dan Rooney, President and CEO, stated, "We are excited to receive this significant order, the largest one in our 31-year history, from a new customer in China. The manufacture and installation of CIGS thin film solar technology is accelerating, particularly in Asia, and we are well positioned to benefit from the long-term growth in this strategic global market. Based on orders received year-to-date, our sales of thin film solar products will be significantly greater than 2017."

About SCI Engineered Materials, Inc.

SCI Engineered Materials is a global supplier and manufacturer of advanced materials for PVD thin film applications that works closely with end user and OEMs to develop innovative, customized solutions. Additional information is available at
