

SCI Engineered Materials

High-Temperature Rotatable Indium Bond

SCI Test Parameters

1m (38.22") Rotatable Target

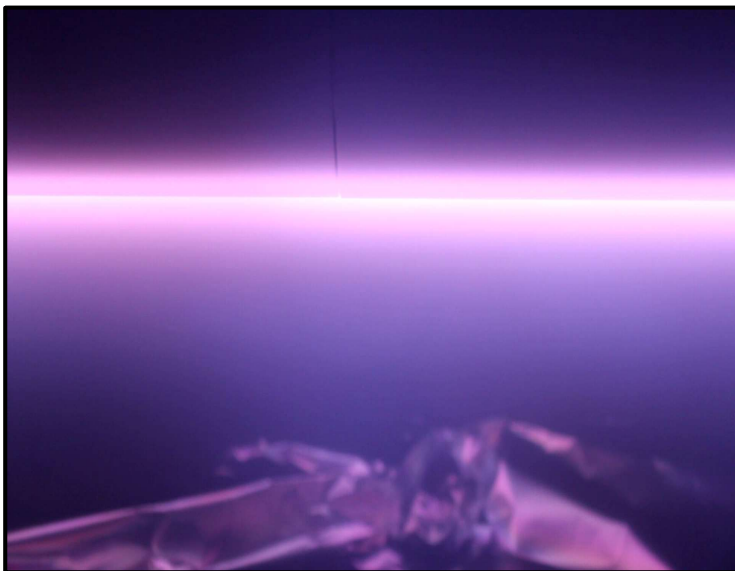

Power: **18-20kW/m**

Upper Temperature: **156°C**

Test Duration: **Continuous 102hrs (8 days)**

Advantages

Increased power of up to **18kW/m** → Increase the power range of your coating arsenal!

Patented & streamlined process → Credible
Reliable
Dependable

Eliminate Target Drift → Perfect solution for vertical cathodes
